Objective:

I have recently completed a web development boot camp, and i am looking for opportunities to apply my new knowledge in full stack development. I am interested in any opportunities to expand that knowledge in all aspects, particularly back end database and API development.

Skills:

Frameworks	jQuery, Express.js, Bootstrap, React.js
Languages	JavaScript, CSS, HTML
Data Query	Mongoose, Sequelize, GraphQL, SQL
Databases	MySQL, MongoDB
Platforms	Heroku, GitHub, GitHub pages

Education:

Feb 2023	Web Development Bootcamp, Butler University	
May 2024	Ivy Tech community college	AA
May 2019	Covenant Christian High School	HS

Work Experience

Sep 2021 - Present	GIS Field Technician, Davey Resource Group, Cincinnati, OH Document utility pole inventory in the Indianapolis region using ESRI Arc GIS mapping tools
Jan 2021 – Sep 2021	Retail Associate, Book-a-Million, Indianapolis IN Assist customers, manage inventory, sales
Aug 2019 – Jan 2021	Server, Cracker Barrel, Indianapolis, IN Server, Cook, Delivery.
Sep 2017 – Apr 2018	Server, Steak-N-Shake, Indianapolis, IN Server, Cashier

Projects:

Subscription Tracks: <https://subscription-tracks.herokuapp.com/login>

This project uses express.js, handlebars.js, SQL, and sequelize to help you keep track of your subscriptions in an SQL database. This was deployed to Heroku using jawsDB

Marvel Reddit Finder: <https://hayek23.github.io/Marvel-Reddit-Finder/>

This project combines calls from two APIs, and merges them together so that you can choose a marvel character and receive a description of that character and some related subreddit posts.
